COMPANY OVERVIEW

Manna Solutions LLC delivers custom artificial intelligence and machine learning solutions to clients seeking to automate, optimize, and scale complex decision-making processes.

Founded by UT Business School–trained technologist Amani Latson, the firm merges deep technical skill with business fluency, crafting machine learning systems that are explainable, ethical, and ROI-driven.

PROBLEM SOLVED

CERTIFICATIONS / LICENSES

UT Business School – Executive Certificate in Artificial Intelligence & Machine Learning AWS

Certified Machine Learning – Specialty

TensorFlow Developer Certificate

CORE COMPETENCIES

Specializations
- Supervised & unsupervised model development (classification, regression, clustering)
- NLP: entity extraction, document classification, sentiment analysis
- Computer vision: object detection, OCR, and image segmentation
- Cloud-based ML deployment (SageMaker, Vertex AI, Azure ML)
- ML Ops: model versioning, CI/CD pipelines, drift monitoring

Service Capabilities
- AI & ML Consulting: End-to-end advisory for strategy, design, and implementation of AI systems.
- Model Development & Deployment: Custom ML models trained for predictive analytics, automation, and pattern recognition.
- Data Engineering: Data collection, cleaning, warehousing, and pipeline automation.
- AI Integration: Seamless integration of AI/ML systems into existing applications and business workflows.

Service Area
- Virtual operations headquartered in Texas

DIFFERENTIATORS

Strategic + Technical Fusion – AI solutions built with business impact in mind, not just experimentation.

Production-Ready AI – Deployment of APIs and apps using containers, stream processing, and edge deployments.

Cross-Functional Fluency – Ability to work with both technical teams and executive stakeholders.
